MIKE LITES

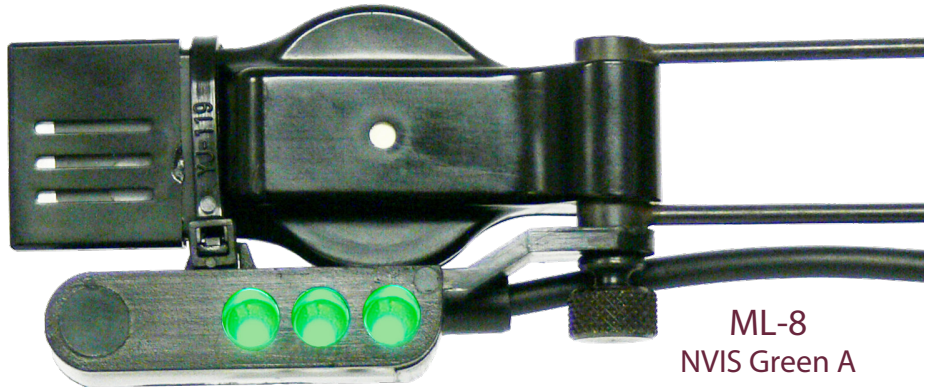

ML-22
NVIS Green A & Filtered NVIS White

ML-14
Bright NVIS Green A & White

ML-18
Filtered NVIS White

ML-8
NVIS Green A

The MIKE LITE (aka the "Lip Lite") is a light that mounts to the microphone on your helmet or headset. It is independent of the microphone and is adjustable. It will not interfere with the proper function or noise attenuating properties of the microphone. The switch is momentary on, push on, push off and is activated with your lip or tongue. The MIKE LITE provides the perfect amount of light without side scatter to illuminate cockpit instruments, maps, kneeboards, circuit breakers, or approach plates. Our ML Series is the original Mike Lite designed specifically for the U.S. Armed Forces.

Only our MIKE LITES meet all 20 required military specifications.

MIKE LITES and Mike Lite Accessories:

ITEM	DESCRIPTION	NSN
